EXPERIENCE

Junior Full Stack Developer
DataSlate L.L.C.
California

01/2021 – 03/2021
Los Angeles,

I had the opportunity to upgrade the Lunde water project under DataSlate from pure Javascript to React (as a contractor).

- Research and Implement Frontend to Back- end interaction to Stripe API
- Build Backend API for
 - Customers
 - Questions,
 - Profile,
 - Orders/ Order Form

Full Stack Developer (Volunteer)
International American University
California

07/2020 – 09/2020
Los Angeles,

I started working with the American International University as a volunteer to continue to develop and progress my skills as a Full Stack Developer. I worked with a team of 3 to help develop a touchless visitor management system using the MERN stack.

Key Accomplishments:

The new system that I helped develop allows customers to custom schedule appointments either online or on-demand onsite using video conferencing. Customers with appointments receive customized QR codes upon approval via email which grants them access to the building. The system also integrates with Google oAuth services for ease of registration & access. Reminders delivered via SMS & email services.

EDUCATION

UCLA Coding BootCamp: Los Angeles, CA
09/2020

03/2020 –

A 24-week intensive program focused on gaining technical programming skills in HTML5, CSS3, Javascript, JQuery, Bootstrap, Firebase, Node Js, MySQL, MongoDB, Express, Handelbars.js & ReactJS.

SUNY Empire State College: Saratoga Springs, NY

2003 - 2008 (Transitioned from American University of Science and Technology, Beirut, Lebanon)

Bachelor of Science - Business and Management Economics
